

## CITY OF CHILDRESS TWDB – CWSRF

- I. West Sewer Plant Renovations – Rebid, City of Childress, TWDB # 73844, Clean Water State Revolving Fund Equivalency
- II. Texas Water Development Board & EPA

- III. Project partially funded with “EPA Clean Water State Revolving Funds”  
\$1,087,644.99
- IV. The City’s airport wastewater treatment facility infrastructure is outdated and in need of upgrades. This facility mainly supports a Texas Department of Criminal Justice prison, Texas Department of Transportation District Office, the airport and a few other commercial customers. The wastewater treatment facility is out of compliance with Texas Commission on Environmental Quality (TCEQ) standards for a number of factors, including exceeding permitted

effluent quantities, biologic oxygen demand, and a lack of infrastructure to divert water to the holding ponds. Additionally, the current bar screens are failing and not preventing trash from entering the treatment facility. The customers will benefit in the locations of the proposed improvements. Features of the project include upgrades to the wet well, new submersible pump installation, cascade well installation, bar screen installation, complete the holding ponds to full operation, relocate irrigation pump and plumbing. If after construction, there are any remaining funds available, they will be dedicated to the City's other WWTF for necessary upgrades.

- V. The proposed project consists of upgrades to the existing airport WWTF infrastructure to bring the facility into compliance with TCEQ standards. Proposed improvements include upgrades to the wet well, new submersible pump installation, cascade well installation, bar screen installation, complete the holding ponds to full operation, relocate irrigation pump and plumbing. Based on the proposed construction associated with this project, and the levels of environmental review required for state review; Categorical Exclusion (CE) will be applicable.
  
- VI. Amarillo Utility Contractors, Inc.
